## Open Access Directories

Open-access (OA) literature is digital, online, free of charge, and free of most copyright and licensing restrictions. (Peter Sober)

About Open Access journals: The Budapest Open Access Initiative defines open access literature as "its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself. The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited."
